Supplied weights | NEW matrix | foil 0, z=+10 cm | 2 <= delta < 6% | N=3400

Distributions and residual correlations; raw residuals, no display shifts; statistics include tails

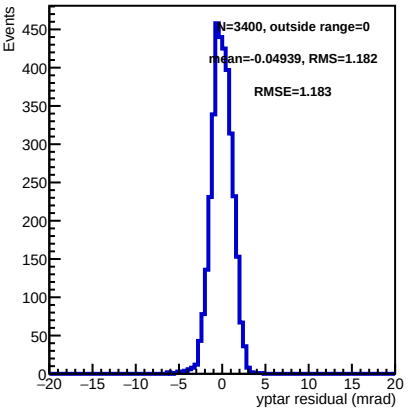

xptar residual

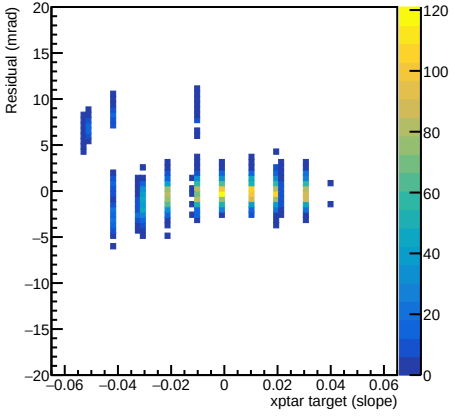

ytar residual

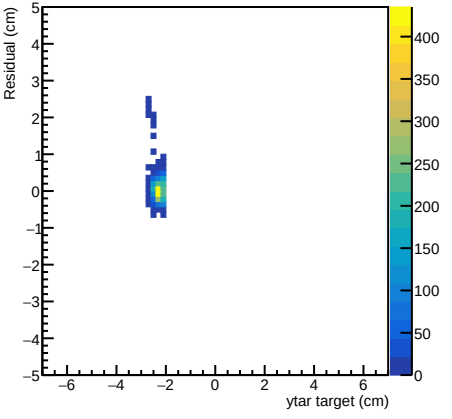

yptar residual

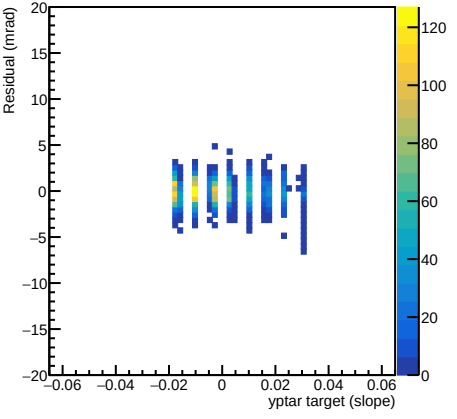

xptar residual versus target

ytar residual versus target

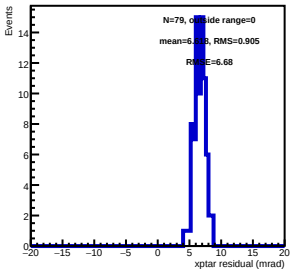

yptar residual versus target

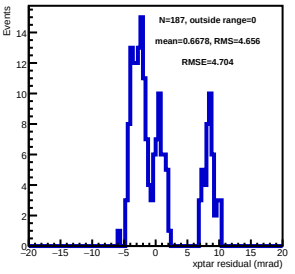

Supplied weights | NEW matrix | foil 0, z=+10 cm | 2 <= delta < 6% | N=3400

xptar residual distributions by x sieve column; empty columns shown explicitly

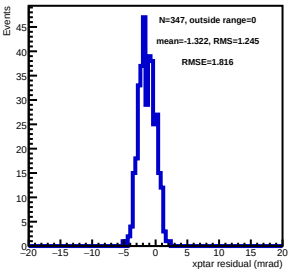

Sieve column -5 (-12.5 cm)

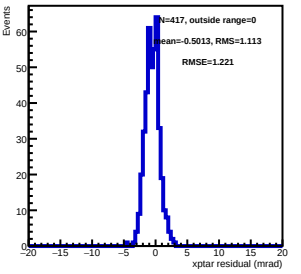

Sieve column -4 (-10 cm)

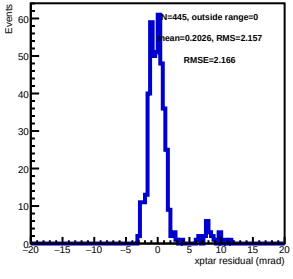

Sieve column -3 (-7.5 cm)

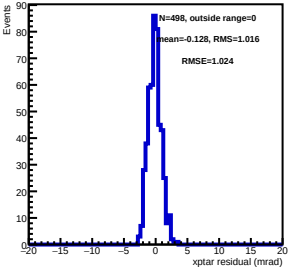

Sieve column -2 (-5 cm)

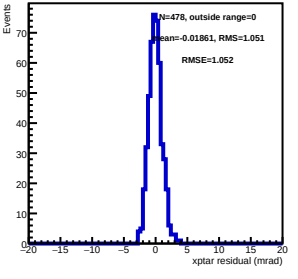

Sieve column -1 (-2.5 cm)

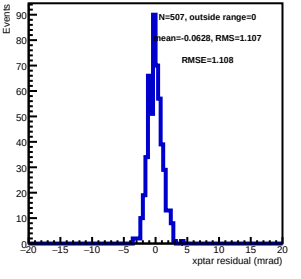

Sieve column +0 (0 cm)

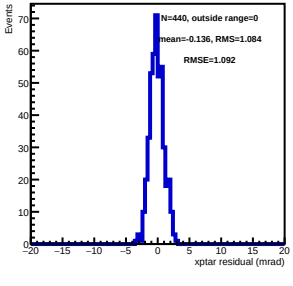

Sieve column +1 (2.5 cm)

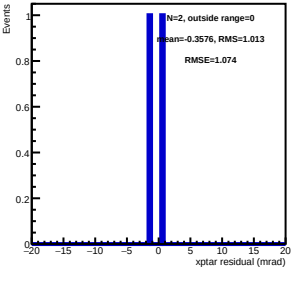

Sieve column +2 (5 cm)

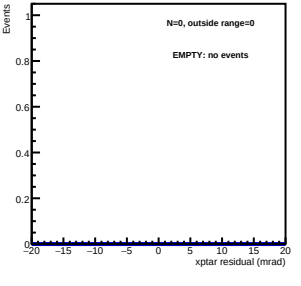

Sieve column +3 (7.5 cm)

Sieve column +4 (10 cm)

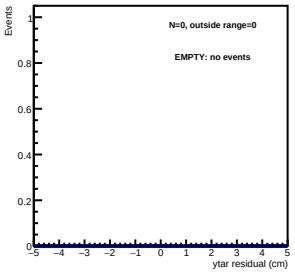

Sieve column +5 (12.5 cm)

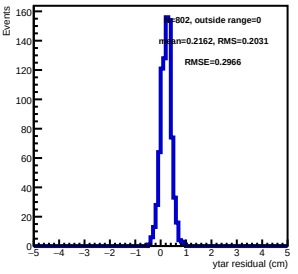

Supplied weights | NEW matrix | foil 0, z=+10 cm | 2 <= delta < 6% | N=3400

ytar residual distributions by y sieve column; empty columns shown explicitly

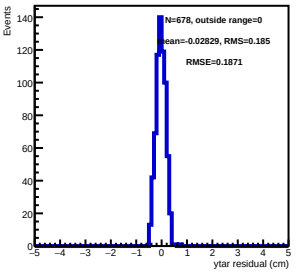

Sieve column -5 (-8.2 cm)

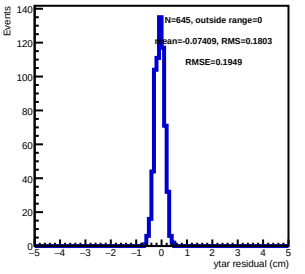

Sieve column -4 (-6.56 cm)

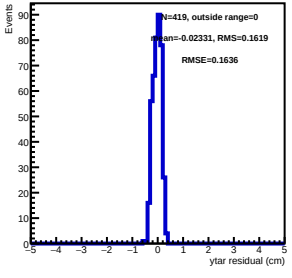

Sieve column -3 (-4.92 cm)

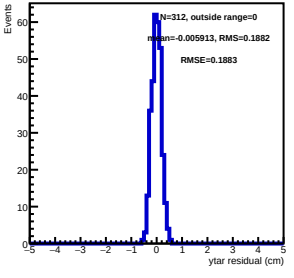

Sieve column -2 (-3.28 cm)

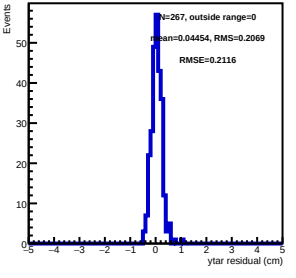

Sieve column -1 (-1.64 cm)

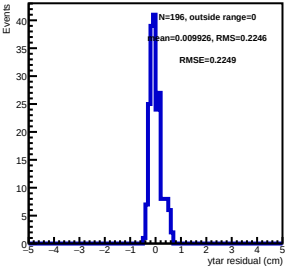

Sieve column +0 (0 cm)

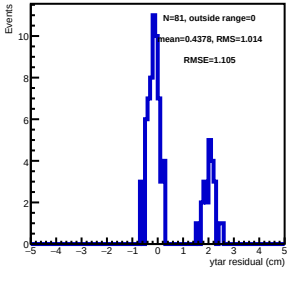

Sieve column +1 (1.64 cm)

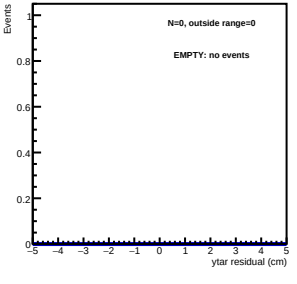

Sieve column +2 (3.28 cm)

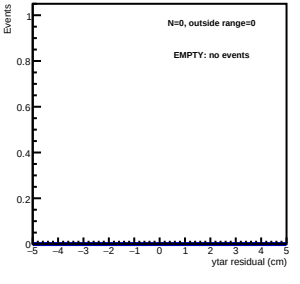

Sieve column +3 (4.92 cm)

Sieve column +4 (6.56 cm)

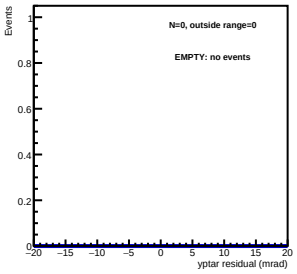

Sieve column +5 (8.2 cm)

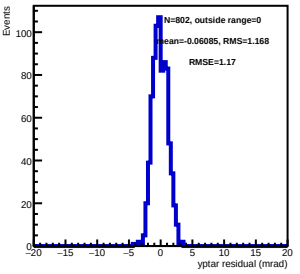

Supplied weights | NEW matrix | foil 0, z=+10 cm | 2 <= delta < 6% | N=3400

yptar residual distributions by y sieve column; empty columns shown explicitly

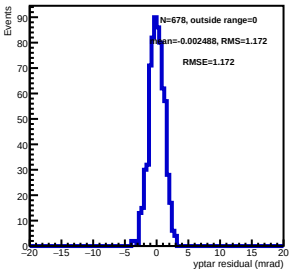

Sieve column -5 (-8.2 cm)

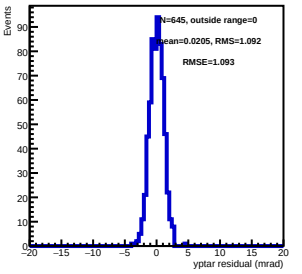

Sieve column -4 (-6.56 cm)

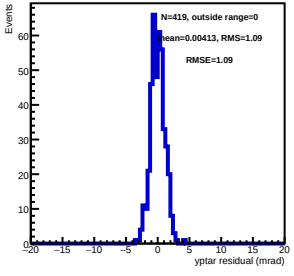

Sieve column -3 (-4.92 cm)

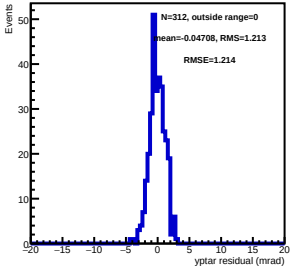

Sieve column -2 (-3.28 cm)

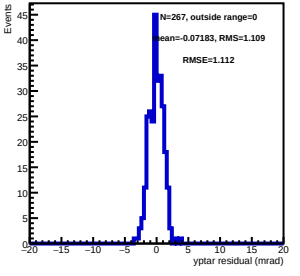

Sieve column -1 (-1.64 cm)

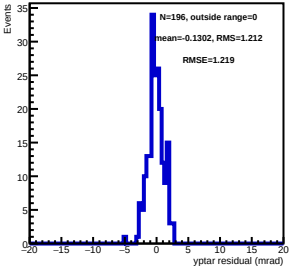

Sieve column +0 (0 cm)

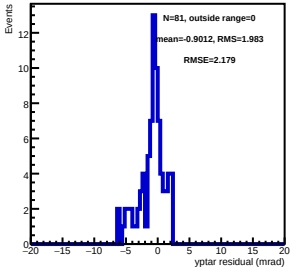

Sieve column +1 (1.64 cm)

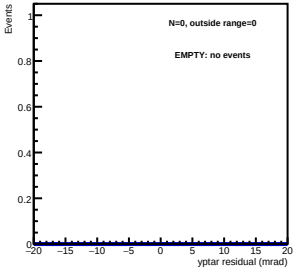

Sieve column +2 (3.28 cm)

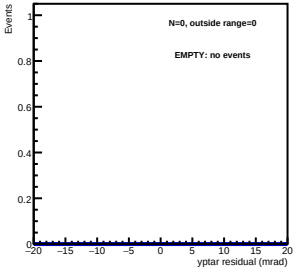

Sieve column +3 (4.92 cm)

Sieve column +4 (6.56 cm)

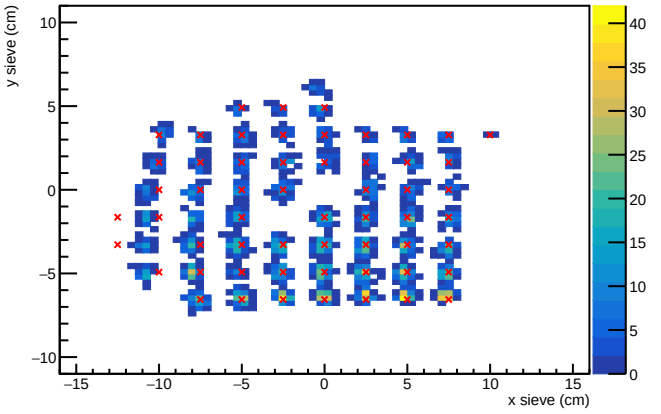

Sieve column +5 (8.2 cm)

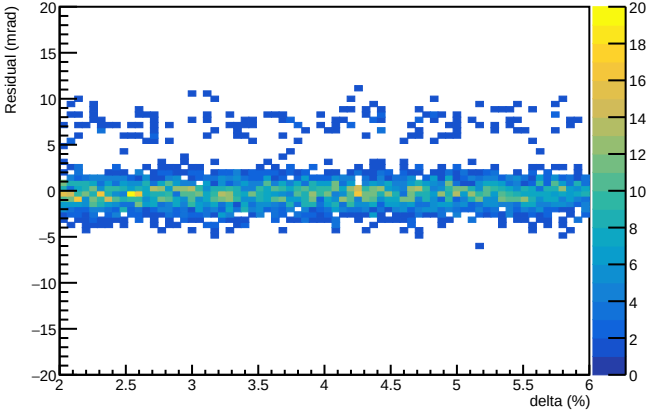

Supplied weights | NEW matrix | foil 0, z=+10 cm | 2 <= delta < 6% | N=3400

Sieve reconstruction and residuals versus delta; fixed geometric xtar, not an iterative replay

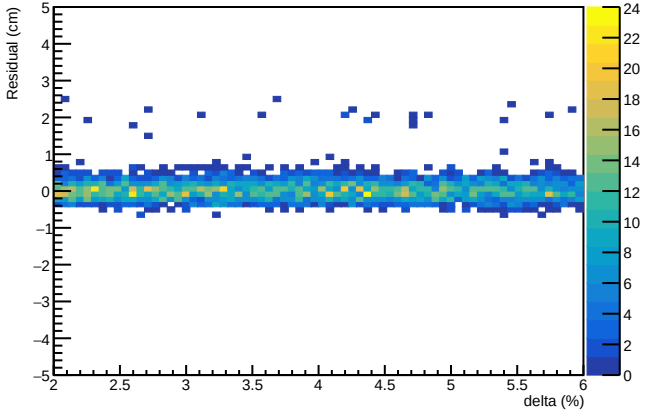

Reconstructed sieve

xptar residual versus delta

ytar residual versus delta

yptar residual versus delta
